Gold status confirmed: Autoneum improves result in EcoVadis sustainability rating for 2024

In the EcoVadis sustainability rating for 2024, Autoneum Holding Ltd was once again awarded the gold medal. The automotive supplier was able to further improve on the previous year's result, placing it among the top five percent of the rated companies for the second time in a row. Autoneum improved its performance in the categories Ethics and Environment in particular, which once more resulted in the second-highest recognition level in the overall assessment.

As the globally leading supplier in acoustic and thermal management solutions for vehicles, Autoneum recognizes its corporate responsibility to continuously improve the sustainability of its products and processes. In the interest of transparent reporting, the Company is committed to regularly informing the public about the most important activities and milestones concerning corporate social responsibility (CSR). To assess the quality of its own sustainability management system, Autoneum uses external platforms such as EcoVadis, which is the world's largest provider of sustainability ratings with over 130 000 evaluated companies from more than 180 countries. In the 2024 assessment, Autoneum was awarded the EcoVadis gold medal for the second year in a row, placing it once again among the top 5 percent of the companies assessed.

In last year's EcoVadis sustainability rating, Autoneum had already improved from silver to gold and thus to the second-highest level of recognition. For 2024, the Company was able to further increase its score in the overall assessment of the four categories Environment, Labor and Human Rights, Ethics and Sustainable Procurement and maintain its EcoVadis gold status despite stricter evaluation criteria. Compared to the previous year, significant progress was made in three categories, particularly in the areas of Ethics and Environment.

"We are very pleased that our sustainability performance has once again been rewarded with the EcoVadis gold medal," says Pascaline Brégeon, Head Strategy and Sustainability at Autoneum. "Sustainability is a key pillar of our strategy, and we are committed to ensuring that growth and corporate responsibility always go hand in hand at Autoneum. Awards from globally recognized rating agencies such as EcoVadis make our ongoing progress in the areas of environment, social, governance, human rights and compliance measurable and tangible and show that we are on the right track."

More information on Autoneum's sustainable products and processes can be found in the current issue of the Corporate Responsibility Report:
